~2500lbs / panel

Overview

Strad specializes in equipment rentals, including large fluid storage solutions. Our EcoPond® is a patented composite tank design that comes in a broad range of sizes to fulfill unique project requirements and job conditions.

Strad engineered this composite containment solution to work safely, reduce environmental impact and lower completion costs. Our tanks are a greener solution with a smaller footprint that can remove 50-100 trucks from the road for a single well completion.

Strad offers a respectable tank fleet size, capacity range, a high safety standard and extensive experience with an excellent track record.
