

# MegaDeck® HD+

## STRAD IS YOUR PREFERRED CANADIAN DISTRIBUTOR FOR MEGADECK® HD+

In partnership with Signature Systems, Strad is bringing the MegaDeck® HD+ technology to Canada’s matting industry.

MegaDeck® HD+ composite construction mats provide strong, interlocking support for the toughest working conditions. Protect employees and equipment with heavy-duty roadways and work platforms. Overlapping flanges and vibration-resistant locking technology keep mats in place over any terrain. Mats are 7.5’ wide x 14’ long and rated for 600 psi.

### MegaDeck® HD+ Features

- High-Density Polyethylene (HDPE) with special impact modifiers that incorporate UV resistance and anti-static properties.
- 600 psi weight loading depending on subsurface conditions.
- Aluminum core pin with engineered plastic casing that inserts directly into large pin holes in the mat, eliminating the need for the cam system.

### MegaDeck® HD+ Advantages

- MegaDeck® HD+ mats are a more durable, sustainable, and cost-effective option for industrial matting needs.
- Flammability resistance rated at UL94HB.
- Helps keep personnel, equipment, and the environment safe.

### Specifications

Module Size	Actual: 7.5’ L x 14’ W x 4’ H Usable (due to flange): 6.5’ L x 13’ W x 4’ H
Weight	1,025 lbs
Flange Thickness	2 in
Weight Loading	600 psi
